

Instructions for connecting to the wireless network service Eduroam

For proper configuration of your iPhone, please follow the procedure below.

1. In the list of available wireless networks select “Other”
CAUTION do not select the eduroam network as this will use automatic settings which are not correct.

2. In the network name field, type **eduroam** and then select the **Security** tab.

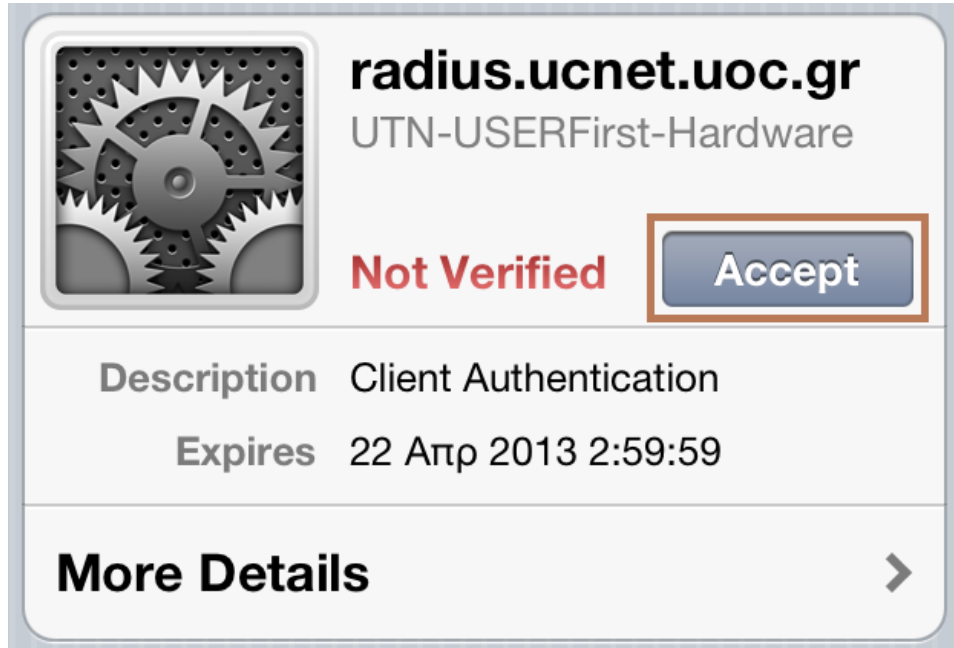

3. The **Security** settings will appear, select **WPA2 Enterprise**.

4. Please provide your account credentials where Username is in the form **user@uoc.gr**.

5. A message will popup asking you if you accept this connection, you should choose **Accept**.

6. Finally, you may confirm that in the list of available wireless networks, the **eduroam** has appeared and it is connected.
